Application No.

Continuation of 2. NOTE: Addition of limitations to claims 28 and 38 requires further consideration of all dependent claims under 103 in view of applied art. The new issue added in regards to claims 32 an 42 is that the short term enhancement determines less than five peaks and gains per each sub-frame from said previous excitation signal, requires consideration under 112 1st and 2nd paragraph.

Continuation of 10. Other: Applicant argues that the Su et al. patent (USPN 6,014,622), subject matter and the claimed invention of the present application were owned by Conexant Systems (same assignee). Applicant's arguments are not considered because 35 USC 103(c) only applies to 102(e), (f) and (g) references, not Su et al. reference (102(a)).
